BID SPECIFICATIONS - DOUGLAS ROAD #24

BID DUE DATE:

Bids must be received by the Road & Bridge Office no later than 5:00 PM on Monday August 13, 2012. Any bids received after that time will not be opened or considered.

SCOPE OF WORK:

Crook County is planning to improve a portion of Douglas Road – County Road #24 and is soliciting contractors to haul gravel and water to the site and provide dust control along the route of the project. The project is expected to begin in mid to late August and be completed by mid-September (approximately August 20 – September 28).

The project involves hauling and placing approximately 11,000 tons of County-supplied 50/50 blended reclaimed asphalt and crushed limestone road base. The project also requires provision of a water truck to adequately wet the road to aid in compaction and along the project route to eliminate fugitive dust on the roads for the duration of the project. The road base material will come from the Croell Pit on State Highway 14 (1202 Rifle Pit Road) where the material will be loaded and scaled with Croell equipment and personnel. It is approximately 23 miles west from Croell Pit to Douglas Road # 24. The project begins at the junction of Beaver Creek Road #216 and progresses east 5 miles to State Highway 116. [See attached map].

Dust control on County Roads is of utmost importance to the County for not just the project area, but any County Road(s) used as a travel route to and from the project. Therefore, the contractor shall apply water to the roadway starting ¼ mile of each side of any residence along the haul route on the County Roads. Dust control shall be proactive and occur daily with the water truck in advance of project-related haul trucks throughout the duration of the project, to any part of the project area and any County Roads used for hauling to and from the project site as directed by Crook County Road & Bridge.

PAYMENT TERMS

- ✓ The successful bidder will be paid for the actual tonnage hauled above or below the 11,000 tons as computed using Croell scale tickets.
- ✓ Water truck rate will be daily based on use.

BIDDERS/CONTRACTORS RESPONSIBILITIES

- ✓ Work only during daylight hours Monday Through Friday with no loads arriving to project any later than 5:00 PM.
- ✓ Work under the supervision/coordination of the County Road and Bridge Project Foreman.
- ✓ Travel 5 mph under all posted speed limits on County roads.
- ✓ Provide the Project Foreman with all the load tickets at the end of each day.
- ✓ Haul and apply water to the road(s) as requested by Road & Bridge Foreman.
- ✓ Provide dust control on any County Road used for travel to and from the project location upon request of the Road & Bridge Office.

Equipment specifications/requirements

- ❖ Five (5) tractors with single belly or side dump trailers capable of legally hauling a minimum of 23 tons by WYDOT standards.
- ❖ One (1) water truck or tractor with water trailer capable of loading itself or with contractor-provided pump with spray bar capable of legally hauling a minimum of 3,500 gal by WYDOT standards.

CROOK COUNTY RESPONSIBILITIES

- ✓ Provide and maintain all necessary road work and traffic control signage.
- ✓ Provide water source at the Inyan Kara Creek Reservoir on Floyd Canfield's property. {see attached map}
- ✓ Provide equipment and personnel to spread the gravel and keep the road in travelable condition.
- ✓ Provide approximately 11,000 tons of 50/50 blended asphalt crushed limestone.
