(307) 283-4548

_____ This application is for a newly permitted installation – fee: \$200.00

_____ This application is for a re-inspection – fee: \$200.00

Inspection:

The County Inspector will inspect each newly permitted installation and conduct re-inspections of installations, as necessary.

The person or entity that holds the permit is required to give two (2) working days notice to the County Inspector through the Crook County Growth & Development Office before the time the inspection shall occur:

- A. A specific time for the inspection shall be scheduled.
- B. The inspection shall be scheduled for a regular business day.

**** The inspection must be made while the essential elements of the small wastewater treatment facility are exposed and can be readily seen, identified and measured.**

Owner/Permittee Initial: _____

The County Inspector shall make such observation and measurements that will allow the designee to determine whether or not the small wastewater treatment facility is installed in accordance with the permit issued by the Wyoming DEQ. A statement of compliance or non-compliance shall be issued immediately upon completion of the inspection. A copy of those statements will be sent to the Wyoming DEQ.

If the County Inspector is not on site within three (3) hours of time for which inspection is scheduled, it is automatically assumed that the installation to be inspected is in compliance, and a statement of compliance will be issued.

Any non-compliant small wastewater treatment facility shall not be put into operation. Upon correction of all non-compliant items, a new application for inspection will be required. Another inspection will be required before a statement of compliance will be issued.

I certify that the information provided on this application is, to the best of my knowledge, accurate and without error.
