Would you have enough bandwidth if we were to start the school year with Distance Learning? (Take into consideration all of your students may have a zoom meeting at the same time.)

Rural area with one provider so some days we have no internet

6/1/2020 10:29 PM

[View respondent's answers](#)

[Add tags -](#)

We used 95-100 gb/mth of internet to support 2 students and 1 para in the household. No compensation for increased bill. Verizon Jet back is our only option for rural area.

I have no idea, I don't think it was the fault of the service as much as it is the location of the home. Service in that area is ok somedays really bad the next we just work with it.
